

OceanManager introduces VesTrak.

VesTrak is an advanced vessel tracking system, enabling you to have a clear view of the location of your fleet around the world, assisting in the decision making process by combining inputs from available weather data, identified piracy areas, special areas identified as per the various MARPOL annexes and is useful in reviewing the passage plan for the intended voyage as required by SOLAS Chapter V, Regulation 34.

VesTrak boasts an array of exciting vessel tracking features with interactive user interfaces, advanced vessel search, track movement history, passage plans & distance calculation between points on chart, weather forecast and port information with attractive visual representation and specific information related to your fleet when linked with other OceanManager solutions.
